

“Your Vision is Our Vision”

“A District Vision for Eye Care”
Presented to Qualicum School District 69
May 24th, 2016

Goal

- For School District 69 to endorse the Lions Clubs initiative
- To make a joint School District 69 and Lions partnership project
- To strategically and collaboratively work with the Lions Club of Parksville and area to facilitate early access to the SPOT screeners by students in the education system commencing 2016-2017 term.

A Lions Tradition Carrying On

- Helen Keller referred to Lions as “Knights of the Blind”
- Ongoing Lions investment in support for eye glasses
- Lions oversees investment in supporting vision in third world countries
- Lions on going support for vision screening

Vision Screening in 2015

- Children's vision problems are preventable
- CDC identified millions of children not receiving 11 basic health care needs, vision being one of these
- In 2009-10, 22% of children at age 5 had never had a vision check
- By early intervention, 6 months to 6 years, it is possible to intervene and prevent Amblyopia

Welch Allyn as partners

- In October of 2014 announced its support and provided a major grant to Lions International
- Along with its announcement Welch Allyn acquired proprietary rights to the SPOT vision screener VS 100 (from Paediavision)

SPOT VS 100 Screener

- Handheld instrument
- No hands on with children, done from 3 feet away
- Allows for sight and sound features for children
- Captures data in seconds

SPOT SCREENER

- https://www.youtube.com/watch?v=jLtLe-u_jjY

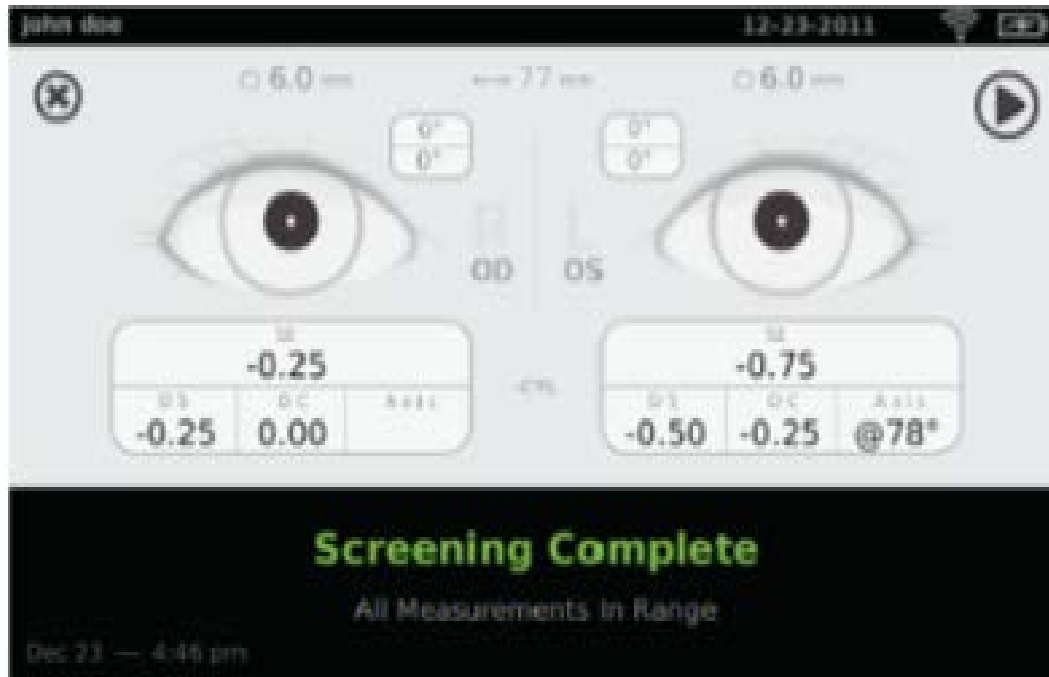

Palmetto Study

- Palmetto Elementary, Florida, serving grades pre-K to 5 with a student population of 795.
- “evidence that reveals vision changes occur the most between the ages of 11-14” ¹
- In the past, to screen a school of Palmetto’s size **takes 3 days and 4-5 screeners.**
- “more than 500 of its students were selected for eye examinations.”

1 . Zabba, Joel N. “Children’s Vision Care in The 21st Century & Its Impact On Education, Literacy, Social Issues, & The Workplace: A Call To Action .” Journal of Behavioral Optometry (2011).

Palmetto Study

- **Spot** screens subject from 3 feet away, capture time of 1 second and delivers immediate, comprehensive and objective results on an easy to read touchscreen.

Palmetto Study

- **537** students screened, 148 referred for follow-up care, just over the one in four national average.²
- 55 already owned glasses, leaving **93** students recommended for follow-up care.
- Myopia, (nearsightedness) 48% + of the referrals, Astigmatism (blurred vision) 37% of the referrals .
- ***Spot*** was able to identify students missed in prior years or not obtained follow-up care from previous screenings.

Palmetto Study

Palmetto Study

- **Post Observations:**
- “One teacher, of an autistic student who now wore glasses, stayed in her seat and kept working, came into the office in tears, she was so grateful,” said Miranda(Principal).“
- “the number of students being referred to the front office for disciplinary reasons from last year to this year has **decreased by 60 percent!**”

Accurate detection With SPOT Vision Screener

- Spot accurately detects the potential indication of these common [vision problems](#):
 - Myopia (nearsightedness)
 - Hyperopia (farsightedness)
 - Astigmatism (blurred vision)
 - Anisometropia (unequal refractive power)
 - Strabismus (eye misalignment)
 - Anisocoria (unequal pupil size)

Screening on Vancouver Island

- Presently VIH provides screening at age 4 as children go from daycare to Kindergarten
- 18% of children who pass the screening at age 5 have vision problems by 16
- 65% of special needs students have vision problems
- 80% of young offenders have vision problems
- EARLY INTERVENTION helps youth

Parksville

- “Your Vision is our Vision” became an initiative of the Parksville Lions Club in 2016
- Research led to choosing the SPOT Screener as a tool
- Contact with Lions clubs already using the SPOT Screener
- Gathered data and information from pilot programs and research on the SPOT screener.

VIH Island Regional Coordinator

Helen VonBucholz

- Provided a verbal endorsement of the project
- Has provided a connection with Esther Pace who is the Central Island Coordinator
- Provided a Training Manual that can assist in the training of the Lions staff
- Has offered assistance in the training process
- Has identified a desire to work with the schools and Lions clubs to enhance health to children

Commitments

- Lions Clubs have combined to provide over \$32,200 since January of 2015
- LCIF provided a grant in October of 2015 of \$15,900
- Provision of 5 SPOT Screeners for Central Vancouver island
- Clubs are committed to a training process in the screeners use this Fall
- Welch Allyn is working to be sure the SPOT Screeners are available expeditiously

Welch Allyn

- WA Canada is excited to partner with Lions
- Provided a fixed price for Lions
- Have come to the Island for a presentation

Trend in the USA

- California has just passed new legislation requiring Vision screening in grades K, 2, 5, and 8.
- Recognition that children's eyes are changing as they grow
- Critical age is around age 10-11
- 18% who pass at K have eye problems at age 16

SPOT on and Education

- To work with local school districts to improve access to vision care for students
- Goal to reduce the presence of problems with vision as a cause for problems with learning
- To partner with individual schools and Districts to coordinate and ensure health benefits and confidentiality for students and families

Thank You on behalf of
Parksville Lions Club
