

Technology Integrated Distributed Experiential Studies

Grade 8/9 Program at CEAP (KSS location)

CEAP TIDES is a program for learners who want their education to be based on a blended learning model. For those students who like to dive deeper into their learning both independently and collaboratively. Concepts and skills will be integrated into cross-curricular learning experiences, with all core subjects completed over the 10-month school session. Students in this program are independent learners who must attend in our classroom at Qualicum Secondary School, on 3 designated ½ days per week, and complete 2 days of independent I-learning. Provisions can be made for students to attend school on I-learning days, in our TIDES Classrooms, to complete their work. During this independent work time students can receive support from CEAP/TIDES staff members if needed.

AT TIDES...

- ✓ TIDES provides all aspects of the student's program, with core courses offered in a linear (all year) manner, using a cross-curricular approach to connect learning in different subjects.
- ✓ Students participate in two formal inquiry projects, which incorporate all TIDES core subjects with an effort to integrate students' interests and passions.
- ✓ Students use technology on a daily basis, for their learning and connect them to information and the world around them.
- ✓ Students have access to outdoor space used for a variety of alternative learning experiences, including mandatory participation in sustainability & agricultural practices.
- ✓ Students may attend our TIDES classroom on I-learning days, to work independently. Attendance may become mandatory on I-learning days should the student require more support to be successful.
- ✓ Electives and exploratory courses are co-planned by TIDES staff and parents, with support from community partners. Student service provider funding is available.

TWO TIDES OPTIONS...

- ✓ TIDES CORE: will include Math, Science, Social Studies, English, and Career Education. Other classes are added by using cross-enrolled KSS classes.
- ✓ TIDES FULL LOAD: will include Math, Science, Social Studies, English, and Career Education as well as: French 8 (if in grade 8), Physical and Health Education, Arts Education, and App. Design Skills and Tech General Exploration. (all courses required at each grade level)
