

### HORSE RIDING AND EQUINE CARE FOCUS EDUCATION PROGRAM

This program is designed to accommodate the schedules of intensive horse riders / jumpers and equine care-takers that require a number of hours to pursue their passion while gaining school credit for a number of activities they complete in this field. This is NOT a school district program or academy, but rather a way that school district 69 can provide educational support for students in this field while working in a cooperative manner with barn owners and riding school operators.

This program can accommodate students from Grade 8 to Grade 12, and will use a combination of standard “bricks and mortar” school scheduling with CEAP’s distributed learning courses. Hours spent in horse related activities can be used as partial credit for a number of course credits depending upon the grade. The sample schedule for the year (depending on school timetables and program at the equine centre involved) would see attendance at the equine centre of choice on M/W/F afternoons, and attendance in the CEAP classrooms on T/Th mornings. The equine hours can amount to a minimum of 2 course credits. The CEAP school hours can account for 2 more course credits of choice.

*Equine-related courses and suggested CEAP courses at each grade can include*

Gr.	Equine-related	CEAP courses (suggestions only)
